

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claim 1 (Currently amended): A radio terminal device comprising:

- a portable telephone, the portable telephone including:
 - a printed circuit board having a plurality of electronic components mounted thereon and having a front surface and a rear surface;
 - an internal antenna disposed on the rear surface of the printed circuit board; and
 - a portable telephone housing accommodating the printed circuit board, the portable telephone housing ~~comprising~~ configured by a resin housing covering the rear surface of the printed circuit board and a metal housing covering the front surface of the printed circuit board,
- wherein at least a part of the printed circuit board, on which the internal antenna is disposed, is accommodated in the resin housing.

Claim 2 (Original): The radio terminal device according to claim 1, wherein the resin housing and the metal housing are joined with each other by a curved line from a viewpoint of the side of the radio terminal device.

Claim 3 (Previously presented): The radio terminal device according to claim 1, wherein the printed circuit board and the metal housing are connected with each other electrically.

Claim 4 (Previously presented): The radio terminal device according to claim 1, wherein the internal antenna is disposed near an end portion in the part of the printed circuit board.

Claim 5 (Currently amended): A radio terminal device comprising:

- a portable telephone, the portable telephone including:
 - a printed circuit board having a plurality of electronic components mounted thereon;
 - an internal antenna disposed on a rear surface side of said printed circuit board; and
 - a portable telephone housing for accommodating said printed circuit board and said internal antenna, said portable telephone housing ~~including~~ configured by a metal housing so disposed as to cover a front surface of the printed circuit board and a resin housing so disposed as to cover a rear surface of the print circuit board,
- wherein at least a part of the rear surface side of said printed circuit board, on which the internal antenna is disposed, is accommodated in the resin housing.

Claim 6 (Previously presented): The radio terminal device according to claim 5, wherein the resin housing and the metal housing are joined with each other by a curved line from a viewpoint of the side of the radio terminal device.

Claim 7 (Previously presented): The radio terminal device according to claim 5, wherein the printed circuit board and the metal housing are connected with each other electrically.

Claim 8 (Previously presented): The radio terminal device according to claim 5, wherein the internal antenna is disposed near an end portion in the part of the printed circuit board.

Claim 9 (Previously presented): The radio terminal device according to claim 1, wherein the internal antenna is accommodated in the resin housing.
